In re Application of: Fujisaki

***Examination of Application #10/065,923***

1. Claims 11-28 of application 10/065,923, filed on 30-November-2002, are presented for examination.

***Claim Rejections under 35 U.S.C. § 101***

2. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter or any new and useful improvement thereof, may obtain a patent therefore, subject to the conditions and requirements of this title.

2.1 Claims 11, 13, 15, 17, 19, 21, 23, 25 and 27 are rejected for reciting a process that is not directed to the technological arts. For example, in regard to claim 11, this claim is directed at a simulation software capable of displaying an object and a wrinkle image. To be statutory, the utility of an invention must be within the technological arts. *In re Musgrave*, 167 USPQ 280, 289-90 (CCPA, 1970). The definition of "technology" is the "application of science and engineering to the development of machines and procedures in order to enhance or improve human conditions, or at least to improve human efficiency in some respect." (Computer Dictionary 384 (Microsoft Press, 2d ed.1994)). The limitations recited in claim 11 contain no language suggesting that claim 11 is intended to be within the technological arts. However, please note the method steps of claim 11 recited as part of a "computer-implemented method" would be considered as directed to the technological arts.

2.2 Claim 11 recites and is directed to "A simulation software". The subject matter of this claim is considered to be a computer program that is not tied to the technological arts. It is

In re Application of: Fujisaki

considered that the script is nothing more than printed matter and thus is an abstract idea that is not patentable subject matter.

***Claim Rejections under 35 U.S.C. § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3.1 Claims 11-28 are rejected under 35 U.S.C. 102(b) as being anticipated by the article authored by Kalra et al., hereinafter Kalra, entitled Real-Time Animation of Realistic Virtual Humans.

4.2 Kalra discloses a system for simulating a virtual human that allows real-time animation of the body, head, and hands with deformations [p. 42, col. 1] including: a human hand animation [p.49, 2<sup>nd</sup> col. to p.50, top of 2<sup>nd</sup> col., and Figs. 7-9] showing applicant's claimed limb [the hand] with first and second parts connected by a joint [see the finger details including the segments bounded by the knuckles];

the variable angles of the hand [Fig. 7, the constraint control points]; and

a wrinkle composed of a set of constraint control points, generally selected around a joint which form a 3-D line of points called wrinkle control points [Fig. 7 and p.49, col. 2](applicant's wrinkle image produced on or near the joint (Claims 11 and 12);

a human hand (claims 13 and 14);

texture modeling [p. 43, col. 1] (claims 15 and 16);

In re Application of: Fujisaki

modeling with polygons [p. 43, col. 1] (claims 17 and 18);  
basic data structure for the hand model [p. 49, col. 2] (claims 19, 20, 25 and 26);  
constraint control (wrinkle) points placed on an extended hand to show height and  
amount [Fig. 7 and p. 49, col. 2] (claims 21-24); and  
a realistic human hand depiction showing thickness [any of Figs. 7-9] (claims 27 and 28).

### ***Response Guidelines***

5. A shortened statutory period for response to this action is set to expire **3 (three) months and 0 (zero) days** from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned (see MPEP 710.02, 710.02(b)).

**5.1 Any response to the Examiner in regard to this non-final action should be**

**directed to:** Russell Frejd, telephone number (571) 272-3779, Monday-Friday from 0530 to 1400 ET, or the examiner's supervisor, Jean Homere, telephone number (571) 272-3780. Inquires of a general nature or relating to the status of this application should be directed to the TC2100 Group Receptionist (571) 272-2100.

**mailed to:** Commissioner of Patents and Trademarks  
P.O. Box 1450, Alexandria, VA 22313-1450

**or faxed to:** (571) 273-8300

Hand-delivered responses should be brought to the Customer Service Window, Randolph Building, 401 Dulany Street, Alexandria, VA, 22314.

Date: 28-November-2005
